

Learning While Playing

Our program focuses on development of listening and speaking skills and on cultural awareness.

The program follows the natural sequence of language:
understanding → speaking
→ reading → writing.

Learning while playing is our philosophy because learning a second language at an early age is not only easier, it also has a positive effect on intellectual growth.

Spanish Language Center

Our Spanish language programs are designed for children from pre-kindergarten through Grade 5, with age-appropriate fun lessons that stress grammar, vocabulary and conversation.

The curriculum has been carefully developed by educational specialists in the field of foreign languages.

At this early age children absorb language and imitate sounds more easily. They are apt to become fluent and speak with a near-native accent!

Bring your children to us once or twice a week and watch them become proficient in Spanish - the fastest growing second language in the United States.

ELEMENTARY PROGRAM
